

## Shaun Barlow, E.I. Project Manager

Mr. Barlow is a Project Manager with over 8 years of experience managing construction projects in SE Idaho. He has worked on various projects including: industrial, commercial, and residential land development. Management of contractors and contracts, oversight of scheduling and budgets, project planning and permitting. His background in construction coupled with an education in civil engineering has provided him with a solid understanding of successful project management principles.

Shaun is able to effectively and efficiently communicate ideas, develop solutions to complex problems, and to establish and execute goals. He is a valuable team member in whatever capacity is required.
